STAINLESS STEEL WELDING & FABRICATION

HYGIENIC PIPE SERVICES provides a complete, swift and cost-effective solution to all your stainless pipe and systems requirements. Our friendly manner on site belies our obsession with excellence.

While you are busy solving problems in your organisation, we are busy making sure that we aren't one of them.

NIALL MEEHAN owns and operates Hygienic Pipe Services. He worked for many years in the UK—CIP & Process Engineering industry—and is coded in all aspects of stainless steel welding and fabrication.

His speciality is Orbital Tig Welding in Clean Environments.

**HYGIENIC PIPE SERVICES offers a wealth of skills and over 28 years of experience in stainless steel pipe and systems installation.**

*Our services include:*

■ **Project management:** We have extensive experience in evaluating a project or installation, allocating adequate resources, and taking responsibility for completion on time.

■ **Quality of work:** All our work is carried out by coded welders and inspected by dye pen, X-ray, or Boroscope. We number our welds and provide weld maps for complete traceability. We assume total responsibility for the quality of our work.

■ **Problem Solving:** Part of what we do involves inspecting and troubleshooting CIP systems. We liaise with plant and process managers, agree outcomes and deliver results within an agreed timeframe.

■ **Cleaning in Place (CIP) Installation:** We have vast experience in all aspects of CIP Systems, from initial unit placement and risk assessment right through to the inspection and commissioning of systems.

■ **Experience in Clean Environments:** We have completed jobs in clean environments to the absolute satisfaction of Pharmaceutical, Brewery and Dairy Customers. All concerns of the customer in the area of process and method are fully addressed. We are comfortable with adhering to strict controls and policies insisted on by our clients.

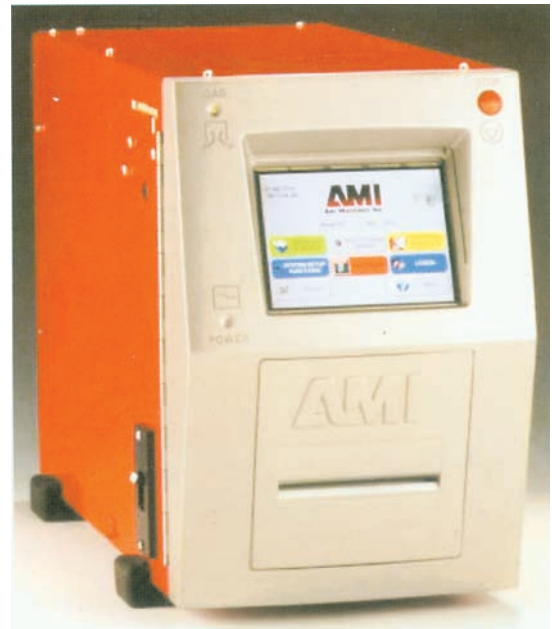

■ **Orbital Welding:** We operate an orbital Tig welding division, which allows speed of pipe assembly with a superior weld finish. This service can be independently hired as required. All our operators are coded for orbital welding.

## ORBITAL WELDING DIVISION

*Hygienic Pipe Services* operates up-to-date orbital welding machines. Our operators are fully coded for Orbital TIG Welding.

- This service is available as part of our general installation of pipe work and systems.
- We are also amenable to hiring this service, complete with operator, to firms who may otherwise not have a machine available.
- This can be a cost effective solution to hiring a machine and seeking to source a coded operator.
- We number our welds, and provide weld maps of all welds for full traceability.
- We take complete responsibility for all our work and welcome x-ray inspection and boroscoping.
